

Customer Advice - Recording Programmes

❖ MY SKY HDi - 2-tuner functionality

MY SKY HDi will initially use only two of its four tuners to receive programmes.

With two tuners, you can:

- ◆ record one SKY Digital programme and, at the same time, watch a different SKY Digital programme.
- ◆ record one programme, watch a different programme, and use Live Pause or Instant Rewind, if you wish to.
- ◆ record one programme and, at the same time, use a SKY Active interactive application, such as play a game.
- ◆ record two programmes at the same time, and watch one of the programmes that is recording.
- ◆ record two programmes and, at the same time, watch any recorded programme.

However, if you are recording *two* programmes at the same time, you cannot change to a different channel other than those two recording.

❖ MY SKY HDi - 4-tuner functionality

In the near future, *MY SKY HDi* will be updated automatically (see **Updates to MY SKY HDi** on page 1 of your user guide).

Page 30 of your user guide describes the additional recording choices you will have when all four *MY SKY HDi* tuners are activated, following this update.
